PROJECT UNDERTAKEN:

❖ PC MANAGEMENT SYSTEM

Responsibilities: Worked as a team leader in the group of 4 people and assisted the team members.

Description:
- The project titled as "Pc management system" is a window based application.
- This software which enables user to handle its pc without any difficulty and that is through a single place.
- It provides a single center from where one can operate all the main tools, Programs and more of a computer.
- Main feature of the plan is to provide access to those settings of the system which are otherwise not found directly on the system.
- Our software includes to access most important tools of the system which are called as backbone of the system.
- Another feature includes the scheduling of the system which is most required one by the users.
- It provides to set timer for shutdown the system or restart the system which are otherwise found difficult by normal users.
- Software also includes the security feature which provides some defense against unauthorized access.
- In short this plan is handy, user-friendly software with the help of which even a person who just knows little about computers can find and do settings of its system with ease.
